“We are extremely pleased we chose to work with Penketh Group and MPS team. The service has been extremely good and the machines are excellent.”

Paul Vine
Deputy Head Teacher

“Penketh’s collected all of the information from our old printers and copiers and came up with a £3,000 instant saving... ”

An effective and reliable print management solution...

In November, Leamington Primary School contacted Penketh Group looking for a print management solution to replace two old printers and photocopiers. Penketh Group were able to...

- Implement a reliable, cost effective print management solution
- Install multifunctional machines capable of stapling, folding, scanning, photocopying and printing
- Reduce paper and ink wastage

By recommending and installing three Konica Minolta machines, Penketh Group delivered a solution tailored to the specific needs of the school, this included the secure print feature. All staff are given a personal pin code which is entered before each job is printed. Any incorrect items can be deleted at the machine, and all jobs remain within the machine until the pin is entered, this ensures that no prints are left uncollected.

The new print management solution has meant that Leamington Primary has seen instant savings on both paper and ink costs.

“... We would highly recommend Penketh Group's print management solution”

Paul Vine, Deputy Head Teacher
